

TM-Series

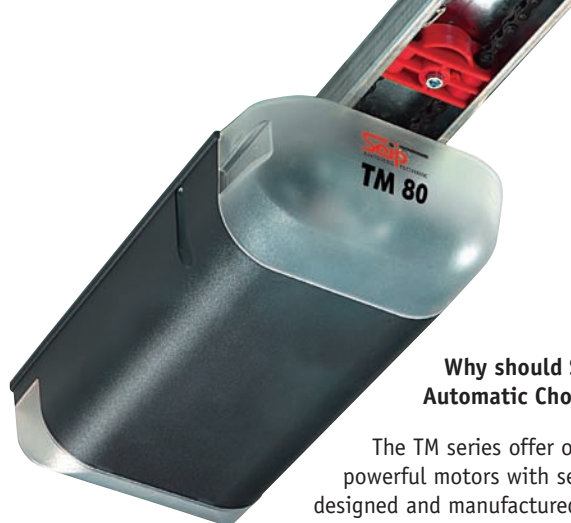

Garage Door Operators

**Superbly
Engineered
Innovative
Products**

- Totally maintenance free
- Convenience at an affordable price
- 5 year manufacturer's warranty*

*subject to terms and conditions

Why should SEIP be your Automatic Choice

The TM series offer only **quality components**: powerful motors with self locking gears and electronics designed and manufactured in Germany. We are one of few manufacturers using quality galvanized steel with a thickness of 2.5 mm to assure the highest mechanical strength.

The **compact design** of the TM series is highly efficient and space saving.

We have confidence in our products, backed up by our **five year manufacturer's warranty**. In support of this claim, our products are running on permanent test. On our test stands, operators run 24 hours a day, 365 days of the year to check and prove the strength and reliability of components. Under stringent test conditions, we reach a minimum of 60,000 cycles, moving weights up to 100 kg.

And finally, **SEIP UK LTD** prides itself not only on its superb range of quality products, but with providing all customers with a back up service second to none!

Garage Door Operators

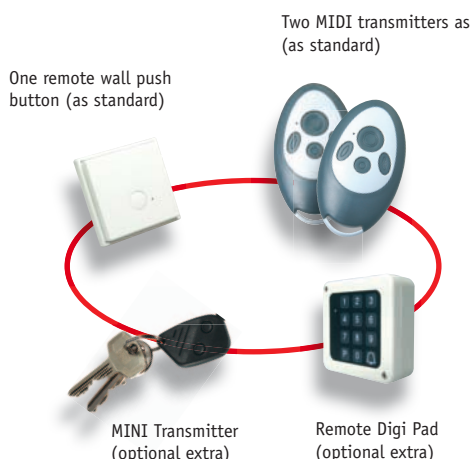

The Automatic Choice

Seip testing stand

Pressure safety testings

Replacement components easily exchanged and widely available. In the unlikely event of failure, with Seip there is no need to purchase a costly motor head

The appeal of the TM series is its simplicity. The well proportioned 4 button MIDI transmitter is simple to use. We also have a smaller 2 button transmitter which makes an ideal optional extra.

Technical Data	TM 50	TM 80
Max. Pulling Force	50 kg	80 kg
Max. Peak Force	75 kg	100 kg
For Door Weight	<120 kg	<200 kg
At Door Size	<10 m ²	<15 m ²
Max. Running Speed	18 cm/sec.	14 cm/sec.
Opening Time for 2.10m at max. Speed	12 sec.	16 sec.
Closing Time for 2.10m at max. Speed	16 sec.	18 sec.
Integrated Lighting	230V AC, max. 40 watts	230V AC, max. 40 watts
Lighting Duration adjustable	30 sec. to 10 min.	30 sec. to 10 min.
Light separately switchable	yes	yes
Automatic Closing	adjustable	adjustable
Pre-Warning Light	adjustable	adjustable
Max. Number of Remotes	10	10
Power Consumption in Stand By	2.0 watts	2.0 watts
Supplied Voltage	190 - 250V AC	190 - 250V AC
Net Running Length	2,500 mm	2,500 mm
Max. Running Length with Extension	3,000 mm	4,000 mm
Overall Length	3,150 mm	3,150 mm
Minimum Head Room above Door	35 mm	35 mm
All Data subject to technical alterations.
